

KSENIA GULYAEVA

FULL-STACK DEVELOPER

ABOUT

As a highly motivated Web Developer, I possess a keen interest in coding, problem-solving, and delivering high-quality results. With prior experience in developing web applications using React and Vue.js, alongside a Node.js backend with PostgreSQL and Neo4j as a database, I am also proficient in vanilla JavaScript and TypeScript. I am constantly seeking opportunities to expand my skillset and learn new technologies.

WORK EXPERIENCE

Cimpress Technology

Amsterdam

<https://cimpress.com>

December 2021 – Present

Software Developer

Cimpress Technology is a company that builds a mass customization platform.

Highlights

- My primary role involves developing and refactoring a TypeScript Node.js and React logistics application used by factory logistics managers.

ABN AMRO

Amsterdam

<https://www.abnamro.com>

September 2020 – December 2021

Software Developer

ABN AMRO is the third-largest bank in the Netherlands. As a software developer, I worked on an internal governance tool that supports company leadership with data for decision-making by providing data insights.

Highlights

- Onboarding new data sources and integrating them into the platform
- Improving the stability of the end-to-end tests by implementing industry best practices
- Cross-team collaboration on shared libraries development
- Implementing features involving changes within the frontend, backend, and database (Neo4j)
- Neo4j graph database requests optimization

Self-employed

Amsterdam

<https://github.com/Ksinia>

February 2020 – August 2020

Full-Stack Developer

After finishing Codaisseur, I worked 30+ hours a week on my projects using the technologies I learned and the new ones I wanted or needed to use.

Android port of the iOS game

- ◀ My most complex personal project to date is Erudite: a Scrabble-like mobile-friendly online multiplayer word game with up to 8 players in a room. During the project's lifetime, I've learned many things about development, data schema migrations, project maintenance, customer interactions, and prioritizing bug fixes and features development using GitHub.
- ◀ Johnny Flame: a 2D side-scrolling platform game I created to learn the Phaser game framework and try out how hard it would be to create a platformer on a web page.
- ◀ RLB-stats: a pure JS frontend for podcast download analytics project written in Go. I created a web page that supports four different JS chart libraries to visualize the same data in different ways.
- ◀ Melodic Dictation: a full-stack app for ear training by writing melodic dictations.

Codaisseur

Amsterdam

<https://codaisseur.com/>
October 2019 – February 2020

Full-Stack Developer Trainee

I completed an immersive 11-week on-site 40 hours a week course on full-stack development.

My project workflow included code reviews and quality assessments, standard practices such as product development, UX design, and domain modeling, working together in teams using tools like VSCode, Git, Github, and Slack.

Highlights

- ◀ Got 100% grades for every assignment during the course
- ◀ Created and published numerous projects in my GitHub account

CJ VFX (visual effects studio)

Moscow

<https://cjvfx.com/en/>
June 2019 – August 2019

Python Software Developer

My first programming job was at a visual effects studio, where I supported internal teams' needs. I had to give it up because of relocation to Amsterdam.

Highlights

- ◀ Created backup/recovery script for corporate files library and visual interface for its configuration in PyQT
- ◀ Started the design and implementation of the VFX render manager interface

Tesler Electronics, Paolo Conte, Revontuli Toys OY

Moscow

January 2010 – May 2019

Procurement Manager

Before switching to software development, I worked in procurement. My primary responsibilities involved searching for suppliers in China, negotiating purchasing prices and other conditions, localizing product packaging and manuals, and controlling the orders from placement until delivery.

EDUCATION

2019
2020

Codaisseur Academy for Full-Stack Web Development

Web development

Courses

- ◀ HTML (HTML5) & CSS (CSS3, Sass)
- ◀ JavaScript (incl. ES6) and TypeScript
- ◀ APIs usage and development
- ◀ PostgreSQL, Sequelize, SQL
- ◀ Node.js
- ◀ React, Redux

2018
2019

Coursera

<https://www.coursera.org>

Software Development

Courses

- ◀ Diving into Python, coursework: sockets client-server application using asyncio
- ◀ Creating web services using Python
- ◀ Programming for Everybody (Getting Started with Python)
- ◀ Beginning Game Programming

2000
2006

Lomonosov Moscow State University

<https://www.msu.ru/en/>

Master's degree

Psychology

Courses

- ◀ Chinese language internship at Peking University in 2005

LANGUAGES

- ◀ English fluent
- ◀ Dutch A2
